Identifications in Collective Membership Mark Applications

The following subject matter is being added as a new subsection to TMEP 1304:

An identification of goods or services is not appropriate in connection with collective membership marks. Trademark Rule 4.8 is a suggested form for collective mark applications in general, but when this form is used for collective *membership* marks, the line "for (Common, usual or ordinary name of goods or services)" should be omitted. A statement (placed after the words "to indicate" in form 4.8) that the purpose of the mark is to indicate membership in an organization, or in an association, a club or the like, as the case may be, is sufficient as an identification in most situations.

Although for the purpose of citing references it is desirable to know something of the general character of the applicant organization (see TMEP section 1304.08(b)), this does not necessarily mean that the identification has to be more specific than indicated above, since the identification may be read along with other information which appears in the registration copy, such as information in the mark itself or in applicant's name. An organization can be understood by knowing the area of activity of its members (for example, they may sell lumber, or cosmetics, or food, or may deal in chemical products or household goods, or they may provide services as fashion designers or engineers or accountants); or, if goods or services are not directly involved, an organization can be understood by knowing the organization's type or purpose (such as a labor union, a service or social club, a political society, a trade association, a beneficial fraternal organization, or the like). The membership mark itself frequently gives this information by reason of having in the mark an indication either of the goods or services of the members or of the character of the organization. If the mark is not sufficiently self-explanatory, applicant's name in association with the mark often provides adequate information.

If information would not appear in the registration copy in the search room in any of the above ways, the normal brief identification should be expanded to state broadly either the field of activity as related to goods or services, or the general type or purpose of the organization. Detailed descriptions of an organization's objectives or activities are not necessary.

Whether or not the normal brief identification is sufficient is within the discretion of the Examiner. If it is determined that the identification should include further information and the information is in the record, the identification may be amended by Examiner's amendment. See TMEP section 1111. If support for such an amendment is not perfectly clear, the Examiner should secure applicant's (or his attorney's) approval for the amendment, which may be done by telephone. See TMEP section 1111.01.

Refusal of Registration on a Reference Mark in Collective Membership Applications

The following subject matter is being added as a new subsection to TMEP 1304.08:

There could be such a relationship between uses of the same or similar mark as a membership mark and as a trademark or service mark that there might be a likelihood of confusion—for instance, when a mark is used by a manufacturer as a trademark for machinery and the same or substantially similar mark is used as a membership mark by members of a machinery manufacturers' trade association.

It should be possible with collective membership marks, as with other types of marks, to secure from the registration copies in the search room sufficient understanding of the use of marks to form an initial decision with regard to citing registered marks as references. (See section 4 of the trademark act.) The Examiner should therefore see that the registration copy will contain information about the collective membership organization which is adequate for this purpose. Such information does not necessarily have to be in the identification clause, however, as the identification may be read along with other information in the registration copy, but it should be in the identification if it will not be found elsewhere in the copy. See TMEP section 1304.16.

Identifications of Publications and Radio and Television Programs in Connection With Title-Marks

The following subject matter is being added as a new subsection to TMEP 804.02:

In case of a mark applied as a title for a specific periodic publication such as a magazine, or as the title for a radio or television program series (see TMEP section 1301.09), it is desirable for the purpose of citing references (see TMEP section 1205) to be able to ascertain from the registration copy in the search room the general field or subject matter to which the publication or the program series is devoted, if there is one—for example, the identification might include reference to psychiatry, engineering, sanitation, and so on. On the other hand, if subject matter is not a significant aspect of the publication or the program series, the identification might then merely give an indication of the general character or type of the publication or program series—for example, by use of a term such as trade magazine, employee newspaper, situation-comedy program series, or the like. The identification of the goods or services is not the only source of the desired information, however. Marks which are titles frequently are self-explanatory. It is common for the wording selected as titles for magazines, for example, to state specifically or to suggest the subject, field of interest or general character of the magazine. This is also true to some extent in connection with radio and television programs. Also, other information which will appear in the registration copy may be considered. Registrant's name often contains wording which indicates the field or character of its business and when taken with the mark may provide sufficient information.

If the character of the publication or program can be adequately understood from the identification in association with other information which will appear in the registration copy, the Examiner should not require that a broad identification be amended to include further detail. Judgment must be exercised in each case, in view of the particular facts, in order to decide how detailed an identification should be, with the Examiner keeping in mind both the necessity of having adequate information and the desirability of eliminating unnecessary correspondence and surplusage.

EXPANDED EXPLANATORY NOTES FOR INTERNATIONAL TRADEMARK CLASSIFICATION

As a part of the international classification for trademarks and service marks, the World Intellectual Property Organization (commonly known as WIPO) has published an alphabetical list of goods and services with an indication of the classes into which the goods and services fall, and in association therewith has published explanatory notes to assist in classifying where it is thought that there is likely to be special difficulty in deciding upon the correct classification. The United States has prepared a set of expanded explanatory notes, to be used in association with the alphabetical list of goods and services prepared by WIPO, which includes essentially all the material in the explanatory notes published by WIPO but which also contains information on additional items. Because of the additional material in the United States notes, they are designated "expanded explanatory notes."

The expanded United States notes identify the international classes by number and by international name. The short titles which the United States has applied to the international class numbers are also included. (See 924 O.G. TM 155 (July 16, 1974).) Under each international class name is the heading "Including" followed by a group of illustrative items; then there is a second heading "Not including" followed by another group of items with indication of the classes in which these items fall. The items chosen are ones in areas where there may be confusion between related classes, and in particular are items which will serve to delineate to a greater extent the problem areas encountered in the examination of trademark and service mark applications in the United States under the international classification system. It is hoped that the expanded notes will provide more understanding of the basis of international classification in accordance with existing WIPO guidelines and will be helpful in determining the classification of goods and services which are not itemized in the international alphabetical list.

The United States expanded explanatory notes deal primarily with goods rather than services, inasmuch as the international and prior United States classes for services largely coincide as to their contents. The major areas in which the correlation of service classes is not exact are identified in the expanded United States notes.

The first version of the expanded explanatory notes was submitted by the United States to the Committee of Experts of WIPO at its meeting in Geneva, Switzerland, in September 1973, and the subject of expanded notes is still under consideration. The expanded explanatory notes published with this notice are the first revision of the expanded notes prepared by the United States, and the notes may be further revised from time to time as the need arises. The expanded notes are used by the examiners in the United States Patent and Trademark Office as a guide classification, along with the alphabetical list of goods and services published by WIPO.

EXPANDED EXPLANATORY NOTES RELATING TO THE INTERNATIONAL CLASSIFICATION OF GOODS AND SERVICES TO WHICH TRADEMARKS AND SERVICE MARKS ARE APPLIED
(First Revision)

GOODS

General Criteria

(a) Finished products are classified, in principle, according to their function or purpose, or the industry which produces them, or subsidiarily, according to the material of which they are made or the trade in which they are sold;

(b) Raw materials, unworked or semi-worked, are classified, in principle, according to the material of which they consist;

(c) Goods intended to form part of another product are, in principle, classified in the same class as that product only in cases where the same type of goods cannot normally be used for another purpose. In all other cases, criterion (a) applies;

(d) As regards kits, in particular, these are classified according to the main articles contained in them (for instance, a case containing essentially cosmetics is classified in class 3, although it might also contain a product which is not a cosmetic preparation).

CLASS 1

(Chemicals)

Name of International Class 1: Chemical products used in industry, science and photography, agriculture, horticulture, forestry; artificial and synthetic resins; plastics in the form of powders, liquids or pastes, for industrial use; manures (natural and artificial); fire extinguishing compositions; tempering substances and chemical preparations for soldering; chemical substances for preserving foodstuffs; tanning substances; adhesive substances used in industry.

Including:

Detergents for use in industrial and manufacturing processes; chemical additives for other products; chemicals and

chemical compositions not otherwise classified; sensitized photographic film (undeveloped); chemical test materials; and diagnostic agents for laboratory use.

Not Including:

Natural resins, chemical products for dyeing, wood preservatives and corrosion inhibitors in the nature of paints (Cl. 2);

Chemical rust removers (Cl. 3);

Chemical preparations used as textile lubricants (Cl. 4);

Pesticides, insecticides, insect repelling preparations, herbicides, bactericides and antiparasitic preparations, diagnostic agents being pharmaceuticals, chemical conductors for electro-cardiographs, nutritive substances for micro-organisms, being culture media, preparations for freshening the air, and adhesives for dentures (Cl. 5);

Adhesive preparations being stationery items (Cl. 16) [adhesive tape for medical or surgical use (Cl. 5)]; plastics in the form of non-textile sheets, plates, foils, blocks, rods, tubes, pipes, stampings, strips and shaped sections, being for use in manufacturing processes; dielectric compositions; chemical preparations for packing and stopping leaks; rubber and substitutes therefor; adhesive tape (not for medical or surgical use and not being stationery) (Cl. 17);

Natural sweetening materials (Cl. 30) [artificial (chemical) sweetening substances (Cl. 1)];

Mulches (Cl. 31).

CLASS 2

(Paints)

Name of International Class 2: Paints, varnishes, lacquers; preservatives against rust and against deterioration of wood; coloring matters, dyestuffs; mordants; natural resins; metals in foil and powder form for painters and decorators.

Including:

Artists' colors, preparations for coloring foodstuffs and beverages, preparations for thinning and thickening paints, filling agents for use in treating walls and the like surfaces prior to papering, painting and similar processes; anti-corrosive products (that is, preservatives against rust).

Not Including:

Anti-incrustation compositions for boilers, synthetic resins in the form of powders, liquids and pastes, waterproofing solutions and chemical preparations for use as coating compositions (not in the nature of paints), drying agents for industrial use, ceramic glazes (Cl. 1);

Protective coatings in the nature of polishes, dyestuffs for toilet use, such as coloring matters for the hair, coloring matters for laundry purposes and paint removing compositions (Cl. 3);

Wax for coating fruits (Cl. 4);

Paint brushes, paint rollers and artists' crayons (Cl. 16);

Insulating varnishes and insulating paints (Cl. 17);

Heavy coatings (not in the nature of paints) for surfacing roofs and roads, and refractory coating materials (Cl. 19).

CLASS 3

(Cosmetics and cleaning preparations)

Name of International Class 3: Bleaching preparations and other substances for laundry use; cleaning, polishing, scouring and abrasive preparations; soaps; perfumery, essential oils, cosmetics, hair lotions; dentifrices.

Including:

Soaps for industrial purposes, medicated soaps and rust removing compositions, pads impregnated with cosmetic material, antiperspirants; artificial eyelashes.

Not Including:

Degreasing agents and detergents for use in industrial and manufacturing processes, chemical products for cleaning chimneys, acid substances used in industry for cleaning purposes, bleaching materials and fabric softeners (not for laundry purposes), metallic soaps, and chemical preparations used in the manufacture of cosmetics (Cl. 1);

Sweeping compounds for absorbing oil from floors (Cl. 4);

Medicated skin creams, medicated toilet preparations, personal deodorants, detergents for medical use (Cl. 5);

Abrasive grinding wheels which constitute machine elements and abrasive sheets and discs designed to be affixed to machines (Cl. 7);

Abrasive hand tools (not power-operated) (Cl. 8);

Decalcomanias for application to the body for cosmetic purposes (Cl. 16);

Steel wool, polishing cloths (whether impregnated with polish or not), soap impregnated pads, non-electric devices and appliances for applying and removing make-up, powder compacts (not of precious metal) and eyebrow brushes (Cl. 21).

CLASS 4

(Lubricants and fuels)

Name of International Class 4: Industrial oils and greases (other than edible oils and edible fats and essential oils); lubricants; dust laying and absorbing compositions; fuels (including motor spirit) and illuminants; candles, tapers, night-lights and wicks.

Including:

Combustible materials such as firewood, fuel briquettes, gasoline, coal, inflammable oils, liquefied petroleum gasses, etc.; animal waxes, vegetable waxes and mineral waxes.

Not Including:

Chemical additives for fuels and lubricants, cutting fluids and brake fluids (not being oils), mold release agents for foundry use, producer gas, fuels for atomic piles, preservative oils for foodstuffs and pipe threading compositions (Cl. 1);

Oils used as a wood perservative (Cl. 2);

Essential oils, cleaning oils, wire drawing soap (Cl. 3);

Oils used for medicinal purposes, disinfectant oils (Cl. 5);

Ski wax (Cl. 28);

Food oils (not including preservative oils for foods) (Cl. 29).

CLASS 5

(Pharmaceuticals)

Name of International Class 5: Pharmaceutical, veterinary and sanitary substances; infants' and invalids' foods; plasters, materials for bandaging; material for stopping teeth, dental wax; disinfectants, preparations for killing weeds and destroying vermin.

Including:

Medicated preparations to be used as additives for foods including vitamin, mineral and protein concentrate additives, dietetic foods for medical use; air freshening and purifying preparations; deodorants of all types including personal deodorants and deodorants used in manufacturing processes.

Not Including:

Diagnostic agents used in the laboratory (not being pharmaceuticals), drugs for industrial purposes, preservatives for pharmaceuticals, defoliants (Cl. 1);

Medicated soaps and medicated shampoos (not being pharmaceuticals), disinfectant soaps, anti-perspirants (Cl. 3);

Disinfectants for laying and absorbing dust (Cl. 4);

Elastic bandages and bandages for ankle joints, dental floss, surgical sponges, medical, surgical and dental instruments and apparatus and specialized utensils used therewith, apparatus and appliances used for therapeutic purposes (Cl. 10);

Preparations which are essentially foods for use as additives to foodstuffs for animals (Cl. 31);

Fruit juices fortified with vitamins, minerals or proteins (Cl. 32).

CLASS 6

(Metal goods)

Name of International Class 6: Unwrought and partly wrought metals and their alloys; anchors, anvils, bells, rolled and cast building materials; rails and other metallic materials for railway tracks; chains (except driving chains for vehicles); cables and wires (non-electric); locksmiths' work; metallic pipes and tubes; safes and cash boxes; steel balls, horseshoes; nails and screws; other goods in non-precious metal not included in other classes; ores.

Including:

Signs (not being luminous or mechanical) and made of metal; building materials of metal and buildings, being fixed metal structures; metal swimming pools, being non-transportable; works of art of common metal (other than bronze).

Not Including:

Metal hardening compositions, metallic carbides in powder form for use in the manufacture of tools, rare and metal earths, electroplating solutions (Cl. 1);

Metal foil and powders for use by painters and decorators, metal preservative preparations (Cl. 2);

Valves made of metal and other metallic elements which constitute parts of machines (Cl. 7) [valves made of metal which are manually operated (Cl. 6); valves made of plastics, and not being parts of machines (Cl. 20)];

Fire escapes made of metal and electric locks (Cl. 9);

Metal fittings for water supply installations (Cl. 11);

Tires (metallic and non-metallic), metal spikes or studs for tires, hardware and driving chains for vehicles (Cl. 12);

Bronze ornaments, commemorative coins, and chains of precious metal (Cl. 14);

Metal plates for engravers, printing type and metallic numerals (Cl. 16);

Rubber hardware, plastic pipe including fittings made of plastic, and metal foil for insulation (Cl. 17);

Harness traces of metal and muzzles (metal) for dogs (Cl. 18);

Non-metallic building elements, portable buildings made of metal and metallic cement (Cl. 19);

Metallic furniture (not including furniture fittings of metal), plastic hardware including non-metallic locksmiths' work, curtain hooks, rings and rods (Cl. 20);

Glass hardware, small domestic containers made of metal, metal troughs for cattle, steel wool (Cl. 21);

Non-metallic ropes, cables, strapping and cordage (Cl. 22);

Metallic yarns (Cl. 23);

Metal tips for boots and shoes, and metal shapes for hats (Cl. 25);

Metallic thread for embroidery and zip fasteners (metal) for clothing (Cl. 26).

CLASS 7

(Machinery)

Name of International Class 7: Machines and machine tools; motors (except for land vehicles); machine couplings and belting (except for land vehicles); large size agricultural implements; incubators.

Including:

Mixing machines for kitchen use, kitchen machines for milling (electric), washing and drying machines for dishes or laundry as well as machines in the nature of bulldozers, cranes or belt conveyors; electric cutlery (not including electric shavers) such as electric knives, electric can openers and scissors; poultry incubators.

Not Including:

Presensitized plates for offset printing (Cl. 1);

Non-power operated hand tools, cutlery including cutlery of precious metals, razors of every type including electric razors, and appliances for sharpening tools (such appliances not being machines) (Cl. 8);

Machines for measuring, weighing, testing and signalling, photographic machines, teaching machines, coin-operated machines, calculating machines, dictating machines, photographic copying machines, machines for recording and reproducing, machines for polishing and cleaning floors (for domestic use), and mechanical advertising signs with alternative displays (Cl. 9);

Apparatus, machines and instruments for medical and surgical use including incubators for babies (Cl. 10);

Installations for heating, cooking, refrigerating and ventilating, hair drying appliances (not being machines) and scrubbers (radial flow and not being machines) for use in cleaning gases (Cl. 11);

Fork-lift trucks, tractors, concrete mixing vehicles, ski lifts, and transmission couplings, belting and motors for land vehicles (Cl. 12);

Pencil sharpening machines (including electric), copying machines (mechanical and chemical, but not photographic), typewriters and similar machines in the nature of office requisites (Cl. 16);

Machine packings, fluid seals (packings), clutch linings and sleeves of rubber for protecting machine components (Cl. 17);

Non-electric carpet sweepers for domestic use (Cl. 21);

Amusement machines (not included in other classes), automatic machines for handling bowling pins and marking machines for lawn tennis (Cl. 28).

CLASS 8

(Hand tools)

Name of International Class 8: Hand tools and instruments; cutlery, forks and spoons; side arms.

Including:

Cutlery of precious metals, as well as razors of every type including electric razors, and manicure implements.

Not Including:

Hand vises (Cl. 6);

Electric cutlery such as electric knives, electric can openers, electric scissors, etc., power-actuated hand tools such as electric hand drills, knives which constitute parts of machines and sprayers being hand operated implements (Cl. 7);

Electrically heated hand tools such as soldering irons and electric curlers for waving the hair (Cl. 9);

Surgical cutlery and spoons for administering medicine (Cl. 10);

Hand pumps for vehicle tires, being fittings for vehicles (Cl. 12);

Devices (being stationery) for cutting tape or similar materials, hand tools in the nature of cutlery for office use, paint brushes and paint rollers (Cl. 16);

Small hand utensils in the nature of houseware items (not being cutlery) such as corkscrews, stirrers, whisks, mixers and mashers (none being machines) (Cl. 21);

Hand tools in the nature of cigar cutters (Cl. 34).

CLASS 9

(Electrical and scientific apparatus)

Name of International Class 9: Scientific, nautical, surveying and electrical apparatus and instruments (including wireless), photographic, cinematographic, optical, weighing, measuring, signalling, checking (supervision), life-saving and teaching apparatus and instruments; coin or counter-freed apparatus; talking machines; cash registers; calculating machines; fire-extinguishing apparatus.

Including:

Electrothermic tools and apparatus such as electric hand soldering irons, electric hair waving tools, electric flat irons, electrical devices such as electrically heated cushions and clothing, electric foot warmers, electric cigar lighters; electromechanical apparatus for the household used for cleaning such as electric vacuum cleaners and floor polishers

[electric vacuum cleaners for industrial use (Cl. 7)]; solenoid valves and automatically operated fluid flow control valves (not being parts of machines) and X-ray apparatus for industrial use; computer programs recorded on magnetic tapes or discs or on punched cards (not including printed instruction manuals); special cases for apparatus and instruments classified in Int. Cl. 9; time recording and time registering apparatus (not being clocks or watches); photographic, electrostatic and thermic copying machines; dictating machines; tape recorders and tape therefor; photographic transparencies and slides.

Not Including:

Sensitised photographic film (undeveloped) (Cl. 1);

Electric motors, generators, alternators and spark plugs for explosion engines, apparatus and instruments actuated by electrical means such as grinders and blenders for foodstuffs, electrical coffee mills and vacuum cleaners for industrial use (Cl. 7);

Electric razors and hair clippers (Cl. 8);

Electrically heated blankets, ophthalmoscopes, blood pressure apparatus and X-ray apparatus for medical use (Cl. 10);

Electrical apparatus for heating, cooking, ventilating or lighting (not included in other classes) including lighting apparatus for photographic purposes (other than flash lamps), laboratory burners and germicidal lamps for purifying the air (Cl. 11);

Electric starters and anti-theft alarms for motor cars (Cl. 12);

Safety fuses for explosive purposes (Cl. 13);

Clocks and watches and other chronometric instruments, control clocks (Cl. 14);

Drawing instruments, teaching materials other than machines, architects' models, electrical pencil sharpening machines, photographic prints, printed manuals for computer programs, charts for use with recording instruments, terrestrial globes, and typewriters (Cl. 16);

Electric insulators such as porcelain insulators, insulating tape and insulating varnish (Cl. 17);

Stands for calculating machines and draftsman's stands (being articles of drawing office furniture) and such stands combined with drawing instruments (Cl. 20);

Electric toothbrushes, egg timers (sand glasses) and measuring cups for use in the kitchen (Cl. 21);

Non-electric cigar lighters (Cl. 34).

CLASS 10

(Medical apparatus)

Name of International Class 10: Surgical, medical, dental and veterinary instruments and apparatus (including artificial limbs, eyes and teeth).

Including:

Elastic bandages and bandages for ankle joints, sutures, dental floss, surgical sponges and rubber articles for hygienic purposes; specialized furniture used by doctors and dentists such as dental chairs and examination tables; and wheeled stretchers.

Not Including:

Bandages except elastic bandages and bandages for ankle joints, dressings (materials for), medicated bandages, pharmaceutical cotton, dental cements and first aid kits (Cl. 5);

Clinical thermometers, respirators and diagnostic computers (Cl. 9);

Electric furnaces for dental purposes and operating room lights (Cl. 11);

Invalids' chairs (wheeled) (Cl. 12);

Electrocardiographic paper (Cl. 16);

Hospital beds (Cl. 20);

Hot water bottles and hospital utensils such as cups, saucers, etc. (Cl. 21);

Hospital sheets (textiles) (Cl. 24);

Body building apparatus (Cl. 28) [apparatus for physical exercise being especially designed for medical or surgical use (Cl. 10)].

CLASS 11

(Environmental control apparatus)

Name of International Class 11: Installations for lighting, heating, steam generating, cooking, refrigerating, drying, ventilating, water supply and sanitary purposes.

Including:

Parts and fittings for installations or apparatus classified in Cl. 11; plumbing fixtures and fittings; air conditioners; portable hair dryers and air purifying appliances (not being machines).

Not Including:

Water conditioning chemicals, heat transfer fluids, ionic exchange resins and filtering materials, being raw or partly prepared vegetable and mineral substances (Cl. 1);

Elbows of sheet metal for hot air distributions (Cl. 6);

Heat exchangers and filters, being parts of machines; washing machines and drying machines for dishes and laundry, hair drying machines (not including small appliances for drying the hair), machines for purifying air, pumps for heating systems and flame-cutting machines for metal (Cl. 7);

Electric kettles, electric fittings, experimental furnaces, crucibles, automatic machines for dispensing hot or cold drinks (coin-freed), dust removing apparatus (electric), signalling apparatus employing lights, flash lamps for photographic purposes and electric traffic signs (Cl. 9);

Ultra-violet, infra-red lamps for medical purposes (Cl. 10);

Filtering paper (Cl. 16);

Refrigerator gaskets (Cl. 17);

Portable ventilating booths used for paint spraying (Cl. 19) [if made of metal and not movable (Cl. 6)];

Mirrors with an electric light, household fire irons and screens (Cl. 20);

Non-electric cooking utensils in the nature of hollow-ware, candle holders and nozzles for sprinkler hoses (Cl. 21);

Textile cloth used for filtering purposes (Cl. 24);

Smokers' lamps (Cl. 34).

CLASS 12

(Vehicles)

Name of International Class 12: Vehicles; apparatus for locomotion by land, air or water.

Including:

Vehicle seat covers (shaped or fitted); parts and fittings for vehicles not otherwise classified; tire repair outfits and tire repair materials (not being adhesive cement or india rubber solutions); motor transmission couplings and belting for land vehicles; invalids' chairs (wheeled).

Not Including:

Metal (non-precious) license plates for vehicles (Cl. 6);

Generators, alternators, carburetors, spark plugs and ignition apparatus (being parts of internal combustion engines), water pumps for vehicles (including land vehicles); engines, transmission couplings, belting and brake linings for vehicles (not including land vehicles) (Cl. 7);

Hand tool kits for working on vehicles (Cl. 8);

Radios, aerials for vehicles, batteries, tape players, thermostats, voltage regulators and apparatus for controlling the speed of vehicles, fire-fighting vehicles and electric cigarette lighters for vehicles (Cl. 9);

Wheeled stretchers (Cl. 10);

Air conditioners, heaters and lights for vehicles (Cl. 11);

Motorized weapons and airborne vehicles such as missiles and rockets (Cl. 13);

Rubber engine mounts and connecting hose for radiators of vehicles (Cl. 17);

Glass for vehicle windshields (Cl. 21);

Sails for ships (Cl. 22);

Vehicle floor mats (Cl. 27);

Training bicycles (stationary) (Cl. 28).

CLASS 13

(Firearms)

Name of International Class 13: Firearms; ammunition and projectiles; explosive substances; fireworks.

Including:

All pyrotechnical products [with the exception of matches (Cl. 34)].

Not Including:

Chemical preparations used in self-defense (Cl. 1);

Firearm lubricants (Cl. 4);

Rocket motors (not for land vehicles) (Cl. 7);

Explosive guns for driving rivets (Cl. 8) [explosive cartridges therefor (Cl. 13)];

Telescopic sights for guns, electrical controls for the firing systems of missiles and satellites (Cl. 9);

Rocket motors for land vehicles, gun racks and game boxes being adapted for attachment to land vehicles (Cl. 12);

Gun racks (Cl. 20);

Cleaning cloths (impregnated or not) for guns (Cl. 21);

Non-explosive guns, being sporting articles for fishing; children's pistols and paper caps therefor (Cl. 28).

CLASS 14

(Jewelry)

Name of International Class 14: Precious metals and their alloys and goods in precious metals or coated therewith (except cutlery, forks and spoons); jewelry, precious stones, horological and other chronometric instruments.

Including:

Imitation jewelry and special cases and containers for watches and clocks; houseware containers made or coated with precious metals; earrings of precious metal; works of art of bronze or precious metal; and control clocks.

Not Including:

Electroplating solutions including gold-plating solutions (Cl. 1);

Precious metal foils or powders used by painters and decorators (Cl. 2);

Precious metal alloys for use by dentists (Cl. 5);

Cutlery which is made or coated with precious metals (Cl. 8);

Time recording and time registering apparatus and control apparatus and instruments (not being clocks or watches) (Cl. 9);

Clothing accessories of non-precious metals such as brooches and cuff links and earrings of non-precious metal or other material (Cl. 26).

CLASS 15

(Musical instruments)

Name of International Class 15: Musical instruments (other than talking machines and wireless apparatus).

Including:

Mechanical pianos and their accessories, musical boxes and strings for musical instruments.

Not Including:

Tape recorders and magnetic tape (blank and pre-recorded), amplifiers for musical instruments, electric door chimes, coin-operated musical instruments and metronomes, cleaning devices for gramophone records (Cl. 9);

Music paper and sheet music (Cl. 16);

Music cases and music bags (Cl. 18);

Music stands, piano stools and benches and music cabinets (Cl. 20);

Musical toys (Cl. 28).

CLASS 16

(Paper goods and printed matter)

Name of International Class 16: Paper and paper articles, cardboard and cardboard articles; printed matter, newspapers and periodicals, books; book-binding material; photographs; stationery, adhesive materials (stationery); artists' materials; paint brushes; typewriters and office requisites (other than furniture); instructional and teaching material (other than apparatus); playing cards; printers' type and cliches (stereotype).

Including:

Plastic film for wrapping purposes, printed instruction manuals for computer programs, photographic prints (snapshots), paper tablecloths, mechanical and chemical copying machines, and household aquariums.

Not Including:

Chemical preparations used in the manufacture of paper, sensitized photographic papers (undeveloped), chemical test papers, blueprint paper and paper pulp (Cl. 1);

Printing inks, artists' materials in the nature of colors Cl. 2);

Abrasive papers and polishing papers (not for dental use) (Cl. 3);

Insecticide papers and medicated papers (Cl. 5);

Aluminum foil for wrapping, staples (not being stationery) (Cl. 6);

Printing plates, pumps for aquariums (Cl. 7);

Paper spoons and knives, palette knives for artists (Cl. 8);

Photographic, electrophotographic, electrostatic and thermic copying machines, dictating machines, apparatus for teaching, punched card office machines, letter scales, adding machines and typewriters adapted for use with data recording apparatus, motion picture films (developed) and photographic transparencies and slides (Cl. 9);

Paper jewelry (Cl. 14);

Insulating paper and sealing strips of paper for windows (Cl. 17);

Building papers and outdoor aquariums (Cl. 19);

Holders for newspapers and draftsman's stands (Cl. 20);

Paper tissues impregnated with a detergent for cleaning dishes, small domestic containers made of paper such as paper cups, paper plates, paper bowls, etc. (Cl. 21);

Twine made of paper (Cl. 22);

Paper bed covers, labels of textile materials and printers' blankets of textile materials (Cl. 24);

Paper clothing (Cl. 25);

Wallpaper (Cl. 27);

Cigarette paper (Cl. 34).

CLASS 17

(Rubber goods)

Name of International Class 17: Gutta percha, indiarubber, balata and substitutes, articles made from these substances and not included in other classes; plastics in the form of sheets, blocks and rods, being for use in manufacture; materials for packing, stopping or insulating; asbestos, mica and their products; hose pipes (non-metallic).

Including:

Plastics in the form of sheets, plates, foils, blocks, filaments, rods, tubes, pipes, stampings, strips and shaped sections, all for use in manufactures; adhesive tape, not for surgical or medical use, and not being stationery; non-metallic seals in the nature of packings for machines; chemical preparations for packing, stopping or insulating (for example, chemical preparations for stopping radiator leaks in vehicles); and electrical, heat and sound insulating materials.

Not Including:

Artificial and synthetic resins in the form of powders, granules, pastes or liquids, rubber solutions (Cl. 1);

Asbestos paints and synthetic rubber coatings in the nature of paints (Cl. 2);

Metallic hose, metallic pipe, wall plugs made of metal and metal gaskets and shims (Cl. 6);

Machine belts made of balata or rubber and blades made of rubber (being parts of snowploughs) (Cl. 7);

Bludgeons made of rubber (Cl. 8);

Asbestos clothing for protection against accidents and fire, insulated electric wire (Cl. 9);

Nozzles made of rubber or plastic for attachment to water faucets (Cl. 11);

Rubber tires and tubes for vehicles and rubber material for retreading pneumatic tires (Cl. 12);

Packing paper, rubber type, plastic film for wrapping purposes and sealing preparations in the nature of paint (Cl. 16);

Rigid plastic sheeting and panels (including insulated building panels) and asbestos cement products for use in building (Cl. 19);

Plastic closures and sleeping bags (Cl. 20);

Packings made of glass or ceramic materials (Cl. 21);

Stuffing and packing materials such as packing string and fibers for packing, gaskets for ships, plastics in the form of artificial textile fibers and plastic bags or sacks (Cl. 22);

Rubber heels (Cl. 25);

Tapes for venetian blinds (Cl. 26);

Decorative plastic sheets for covering walls (Cl. 27).

CLASS 18

(Leather goods)

Name of International Class 18: Leather and imitations of leather, and articles made from these materials and not included in other classes; skins, hides; trunks and travelling bags; umbrellas, parasoles and walking sticks; whips, harness and saddlery.

Not Including:

Leather dressings in the nature of chemical preparations (Cl. 1);

Coloring substances used on leather (Cl. 2);

Oils and greases used in treating leather such as fat-liquoring agents (Cl. 4);

Insecticidal collars for animals (Cl. 5);

Horseshoes made of metal and spurs (Cl. 6);

Paper resembling leather, bookmarkers and book covers made of leather, and luggage tags (being stationery items) (Cl. 16);

Horseshoes made of rubber (Cl. 17);

Dog kennels of wood and hand-bag mirrors (Cl. 20);

Polishing leathers, chamois skins for cleaning, brushes for animals and pet feeding bowls (Cl. 21);

Toys for domestic pets (Cl. 28).

CLASS 19

(Non-metallic building materials)

Name of International Class 19: Building materials, natural and artificial stone, cement, lime, mortar, plaster and gravel; pipes of earthenware or cement; road-making materials; asphalt, pitch and bitumen; portable buildings; stone monuments; chimney pots.

Including:

Portable buildings irrespective of the material from which they are made; works of art of stone, concrete or marble; and building glass, for example, window glass, safety glass and glass tiles.

Not Including:

Drilling muds, chemical additives for drilling muds, cements and similar substances (Cl. 1);

Roof coatings in the nature of paint (Cl. 2) [roof coatings not in the nature of paint and being bituminous coating materials (Cl. 19)];

Metal buildings (not portable), swimming pools of metal, monuments and flagpoles made of metal, metallic products for building purposes such as beams, girders and hardware of metal (Cl. 6);

Drilling rigs (including floating) (Cl. 7);

Refractory furnace linings (Cl. 11);

Sealing and caulking compounds, mastics for joints, concrete expansion joint material, insulating materials and weatherstripping (Cl. 17);

Ceramic shapes (rods, tubes, blocks, etc.) for further fabrication in industry; glass hardware (door knobs, drawer pulls, etc.) (Cl. 21);

Floor tiles or wall tiles of linoleum, plastic or similar materials for application to existing floors and walls (Cl. 27);

Transportable swimming pools (Cl. 28);

Undressed timber (Cl. 31).

CLASS 20

(Furniture and articles not otherwise classified)

Name of International Class 20: Furniture, mirrors, picture frames; articles (not included in other classes) or wood, cork, reeds, cane, wicker, horn, bone, ivory, whalebone, shell, amber, mother-of-pearl, meerschaum, celluloid, substitutes for all of these materials, or of plastics.

Including:

Articles made of plastics or wood and not included in other classes; furniture irrespective of the material used in the manufacture thereof [furniture fittings of metal (Cl. 6)]; works of art of wood, wax, plaster or plastic; mattresses, pillows and sleeping bags.

Not Including:

Furniture fittings of metal including casters and springs, outdoor blinds made wholly or principally of metal, ladders and tool chests made of metal (Cl. 6);

Plastic cutlery (knives, forks and spoons) and household pokers (Cl. 8);

Photographic racks, cabinets for loudspeakers and special furniture for laboratories such as stands especially designed therefor and optical mirrors (Cl. 9);

Specialized furniture used by doctors and dentists, such as dental chairs and examination tables (Cl. 10);

Mirrors for vehicles and children's safety seats which are especially adapted for vehicles, and invalids' chairs (wheeled) (Cl. 12);

Bookends and plastic film for wrapping (Cl. 16);

Walking-stick seats and umbrella furniture (Cl. 18);

Plastic decorations for purposes of construction (Cl. 19);

Cabinets (not being furniture) for holding and dispensing face towels and hand towels, spice cabinets (not being furniture), bath racks and plate racks, chopping boards of wood for kitchen use (Cl. 21);

Hammocks, wadding or stuffing for padding upholstery, and plastic sacks or bags (Cl. 22);

Covers (loose) for furniture (Cl. 24).

CLASS 21

(Housewares and glass)

Name of International Class 21: Small domestic utensils and containers (not of precious metal or coated therewith); combs and sponges; brushes (other than paint brushes); brush-making materials; instruments and materials for cleaning purposes; steelwool; unworked or semi-worked glass (excluding glass used in building); glassware, porcelain and earthenware, not included in other classes.

Including:

Ceramics in the form of rods, tubes, wafers, cylinders, studs and plates, all for use in manufacturers; electric brushes, not being parts of machines, for example, electric toothbrushes and electric clothes brushes; dispensers (box-like devices not of precious metal) for containing and dispensing paper napkins, tissues, etc.; works of art of porcelain, terra cotta or glass.

Not Including:

Soaps (Cl. 8);

Table bells, aluminum foil for use in cooking (Cl. 6);

Power-operated machines, such as grinders and blenders for foods, and washing and drying machines for both domestic and industrial use (Cl. 7);

Goods properly described as hand tools such as can openers (not including electric), bottle openers, flatware (knives, forks and spoons) even though coated with precious metals, razors and manicure implements (Cl. 8);

Electric floor polishing machines and electric vacuum cleaners for domestic use, bathroom scales and electrically heated combs (Cl. 9);

Containers in the nature of trays and adapted for medical, surgical or dental purposes (Cl. 10);

Electric cooking utensils (except electric kettles), electrical apparatus for space heating and ventilating, plumbing fixtures of vitreous china (Cl. 11);

Brushes used in cleaning guns (Cl. 13);

Small domestic containers made or coated with precious metals (Cl. 14);

Graining combs, paint brushes, paint rollers and trays therefor (Cl. 16);

Glass insulators (Cl. 17);

Safety glass, window glass, glass for building purposes including insulating glass (double glazing) (Cl. 19);

Mirrors, including mirrors which are electrically lighted, curtain rods, pins, rings, poles and rollers, clothesline pegs (clothespins), and plastic closures for containers (Cl. 20);

Clotheslines and plastic covers for domestic appliances (Cl. 22);

Tablecloths of textile or plastic materials (Cl. 24);

Table mats and bath mats (Cl. 27).

CLASS 22

(Cordage and fibers)

Name of International Class 22: Ropes, string, nets, tents, awnings, tarpaulins, sails, sacks; padding and stuffing materials (hair, kapok, feathers, seaweed, etc.); raw fibrous textile materials.

Including:

Plastic rope and strapping; fibers and filaments (natural or artificial) for use in the textile industry; and bags not included in other classes.

Not Including:

Chemical preservatives for ropes, nets and similar goods (Cl. 1);

Wire rope or cable, metal awnings, fibers and filaments of common metals, and slings made of metal (Cl. 6);

Rope transport installations, non-skid covers for tires and car seat covers (Cl. 12);

Strings for musical instruments (Cl. 15);

Paper sacks or bags (Cl. 16);

Padding or stuffing in the nature of rubber or plastics and fiber insulating materials (Cl. 17);

Bags in the nature of luggage (Cl. 18);

Sleeping bags (Cl. 20);

Glass fibers for reinforcing plastics; animal bristles (Cl. 21);

Rags (Cl. 24);

Hair nets (Cl. 26);

Nets for use in games (Cl. 28).

CLASS 23

(Yarns and threads)

Name of International Class 23: Yarns, threads.

Not Including:

Compositions for preserving yarns and threads (Cl. 1);

Metal thread for tying purposes (Cl. 6);

Gold and silver thread (Cl. 14);

Rubber and asbestos thread and yarn (Cl. 17);

Glass threads used for non-textile purposes (Cl. 21);

Thread or binding string used in reaping and binding machines (Cl. 22).

CLASS 24

(Fabrics)

Name of International Class 24: Tissues (piece goods); bed and table covers; textile articles not included in other classes.

Including:

Textile materials for covering walls; curtains.

Not Including:

Blueprint cloth (Cl. 1);

Fabric covers (shaped) for use on the rollers of paper processing machines (Cl. 7);

Electric blankets (Cl. 10);
